

I am a resident and a business owner in Indiana. I do not want any businesses calling my home or my business to solicit me for any reason. I pay a lot of money for my phone service so I can communicate with whom ever I please. I do not pay the phone companies to sell or share my phone information to those who disrupt my peace of mind. If phone services were free I could see them saying we don't have a choice. As it is, I do pay. So my choice should be respected to stay private if I choose my own numbers. And please remember. where ever someone else is given a freedom another loses their freedom. If our government allows companies access to my numbers, I lose a freedom. The freedom of privacy. Thank you. If you need to contact me for more information please do so.
